Professional Summary

Results-oriented **Software Developer** with over **13 years of experience** in designing, developing, and implementing innovative enterprise applications. Proven expertise in the **.NET ecosystem**, including **SQL Server, ASP.NET Core API, MVC, and Webforms**. Strong leader with a track record of guiding technical teams, troubleshooting complex issues, and implementing industry best practices to achieve high client satisfaction.

Technical Skills

- **Languages & Frameworks:** C#, ASP.NET Core API, ASP.NET MVC, ASP.NET Webforms, SQL Server.
- **Front-End:** HTML5, CSS3, JavaScript, JQuery, Bootstrap, React.js (Knowledge).
- **AI & Engineering Productivity:** Cursor.ai, GitHub Copilot, ChatGPT, Gemini, Perplexity, Antigravity.
- **Cloud & Architecture:** Azure Cognitive Services (Face API), Microservices Architecture.
- **Tools & Reporting:** Crystal Reports, DevExpress, SVN Version Control, GIT.
- **Security & DevOps:** SHA256 Encryption, OTP Validation, Session Management, CDAC Audited Software.

Professional Experience

BSE Technologies Pvt. Ltd. | *Assistant Vice President* | Sep 2021 – Present

- **Architected and spearheaded** the development of a mission-critical Financial and Accounting System for the **Bombay Stock Exchange (BSE)**, utilizing a hybrid stack of SQL Server, C# Webforms, and .NET Core Web API.
- Engineered and deployed end-to-end modules for Purchase Orders, GRN, AP/AR Invoices, and Payments, directly facilitating efficient group company financial consolidation.
- Optimized legacy workflows by integrating modern Web APIs, ensuring system stability and high-speed data processing for enterprise-level financial reporting.

- **Enhanced development velocity** by incorporating AI productivity tools like GitHub Copilot into the SDLC for rapid refactoring and code optimization.

Spine Technologies Pvt. Ltd. | *Team Lead* | Feb 2021 – Aug 2021

- Rapidly engineered a multi-tenant HR portal to manage employee profiles, attendance, and data segregation for various clients.
- Maintained a core Payroll Engine to automate CTC-based monthly salary calculations and financial disbursements.

Nine Square Solutions | *Senior Software Developer* | Jul 2018 – Jan 2021

- **ICICI Bank Project:** Designed a high-volume system to capture and process printing inventory orders across multiple bank branches, including challan and invoice generation.
- **On-Screen Marking System:** Architected a secure digital grading platform for higher education, automating mark summation and record management for evaluators. *Integrated Microsoft Face API* and random image capture to provide continuous biometric validation of evaluators throughout the grading session. Engineered advanced security protocols, including OTP-based login, multi-system session blocking, and student identity masking. Implemented *Object identification (using Microsoft azure service)* to monitor and prevent unauthorized mobile phone use during active paper checking. Achieved CDAC Audit compliance, ensuring the software met rigorous government standards for security and data privacy.
- **Educational ERP Solutions:** Architected an integrated Educational ERP portal to centralize admissions, fee processing, and examination management for students and staff. Developed a unified communication interface that facilitated real-time updates for news, notices, and academic results. Streamlined administrative operations by digitizing the end-to-end student lifecycle, from initial enrollment to final examinations. Leveraged Web API and .NET technologies to ensure data consistency and high availability across multiple integrated modules.

Tecogis Software Solution | *Software Engineer* | Mar 2016 – Jul 2018

- Spearheaded the end-to-end development of diverse enterprise applications, including the digital infrastructure for PlastIndia 2018, robust Event Management and Registration systems, and community-centric portals like Palanpur Online. Architected scalable web solutions by translating complex client requirements into functional, high-performance platforms, ensuring seamless user experiences and data integrity across all project lifecycles.

J. B. Boda Reinsurance Brokers Pvt. Ltd. | *Software Developer* | Jul 2013 – Mar 2016

- Developed and maintained **REIBS**, a specialized enterprise application tailored for reinsurance brokerage operations. Engineered core financial modules for *finalized contracts, statement of accounts (SOA), and claims management* to ensure precise record-keeping and data consistency. Streamlined the automated receipt generation process, reducing manual overhead and enhancing the accuracy of high-volume financial transactions within a specialized software environment.

Unigem (India) Pvt. Ltd. | *Software Programmer* | Aug 2012 – Jul 2013

- Managed and optimized core Account and Payroll systems, ensuring the integrity of financial data and automated salary disbursements.

Education

- **MSc-IT (Master of Science in Information Technology)** | Mumbai University 2009 – 2011
- **BSc-IT (Bachelor of Science in Information Technology)** | Mumbai University 2006 - 2009

Key Projects

- **BSE Financial System:** Enterprise-scale accounting and consolidation engine.
- **On Screen Marking:** CDAC-audited software featuring object identification to prevent unauthorized mobile use during paper checking.
